

Workflow in CESM2

Jim Edwards

NCAR/CGD

jedwards@ucar.edu

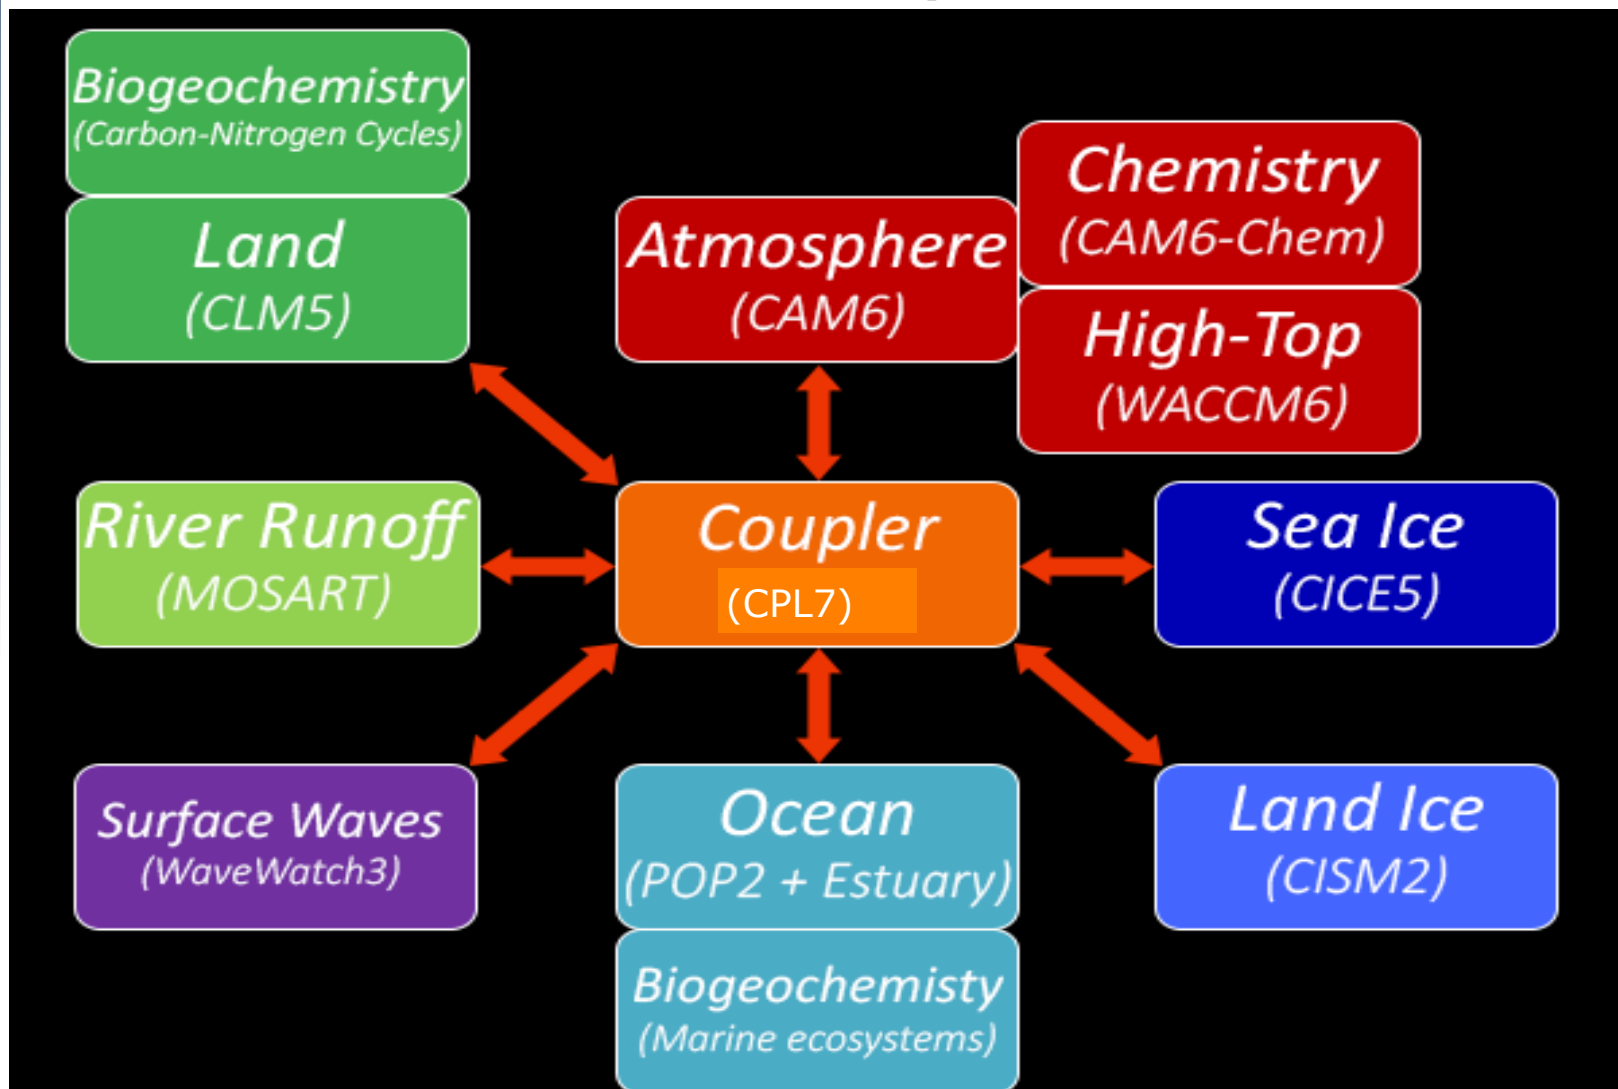

Building reproducible workflows for earth sciences

ECMWF Oct 14-16, 2019

Overview

1. CESM2, CIME and the Case Control System.
2. Expanding CIME workflow capability
3. Projects using CIME workflow:
 - a. Basic experiment workflow
 - b. Ensemble workflow using CYLC
 - c. NCAR/ICCC CMIP6 Large Ensemble
 - d. Seasonal Forecast Experiment

CESM2 Components

CESM2

- Version Control
 - Each component has its own version control and governance
 - Top level repo is a collection of hashes referring to component repositories
 - Component repos may use git or svn
 - Managed via an NCAR developed tool `manageExternals`
- Supports a diverse user community and range of hardware

tag CAMMERS

* indicates current revision used in externals tagging)

Who / When	Revision	Path	Clickable URL	bfb?	Exists?
Chris Fischer (2018-11-15)	cesm2_1_alpha01f		https://github.com/ESCOMP/cesm/tree/cesm2_1_alpha01f	some	NA *
Use cmp6 refoases for standard B1850 and BHIST compsets					
- change answers for B1850, BHIST, B1850, BHIST and B1850 at f09_g17					
- Add tests for BHISTCMP6 and BWC024cmips					
Fix use_init_interp with B1850 ERT test.					
Chris Fischer (2018-11-27)	cime_cesm2_1_rel_06	cime	https://github.com/ESMCI/cime/tree/cime_cesm2_1_rel_06	all	Yes *
Update addmetdata for POP-ECT.					
Fix new pylint errors					
Chris Fischer (2018-11-16)	cime_cesm2_1_rel_05	cime	https://github.com/ESMCI/cime/tree/cime_cesm2_1_rel_05	all	Yes
Do not include time of day in cpl auxiliary hist file names					
Chris Fischer (2018-11-13)	cime_cesm2_1_rel_04	cime	https://github.com/ESMCI/cime/tree/cime_cesm2_1_rel_04	all	Yes
- Fix 2010 period for data GENF3v1.					
- Update pyCECT to v3.0.8					
Cheryl Craig (2018-11-26)	release_tags/cam_cesm2_1_rel_05	components/cam	https://svn-csm-models.cgd.ucar.edu/cam1/release_tags/cam_cesm2_1_rel_05	some	Yes *
Change how SDYN is selected in CAM from a time component to a CAM qualifier					
SD compacts change answers					
Brian Eaton (2018-11-26)	release_tags/cam_cesm2_1_rel_04	components/cam	https://svn-csm-models.cgd.ucar.edu/cam1/release_tags/cam_cesm2_1_rel_04	some	Yes
Fixes for simple models w/ EUL dycore.					
BFB except:					
1) Eulerian dycore with analytic baroclinic wave ICs and terminator chemistry.					
2) Eulerian dycore with moist simple physics (kessler or t32016).					
Brian Eaton (2018-11-21)	release_tags/cam_cesm2_1_rel_03	components/cam	https://svn-csm-models.cgd.ucar.edu/cam1/release_tags/cam_cesm2_1_rel_03	all	Yes
Workaround to add aircraft CO2 emissions file used by BGC to cam.input_data_list					
Cheryl Craig (2018-11-15)	release_tags/cam_cesm2_1_rel_02	components/cam	https://svn-csm-models.cgd.ucar.edu/cam1/release_tags/cam_cesm2_1_rel_02	all	Yes
Cleanup science support flags and remove failing SE test					
Brian Eaton (2018-11-06)	release_tags/cam_cesm2_1_rel_01	components/cam	https://svn-csm-models.cgd.ucar.edu/cam1/release_tags/cam_cesm2_1_rel_01	all	Yes
- Change CAM externals to use release_tag versions.					
- Disable ability of SE dycore to run with topography or with the new CGLM advection and physics grid. The dycore may still be run for simple models and aquaplanet mode using the GLL advection.					

CESM2 Experiment Database

CIME:

Common Infrastructure for Modeling the Earth

A collection of earth system model infrastructure tools

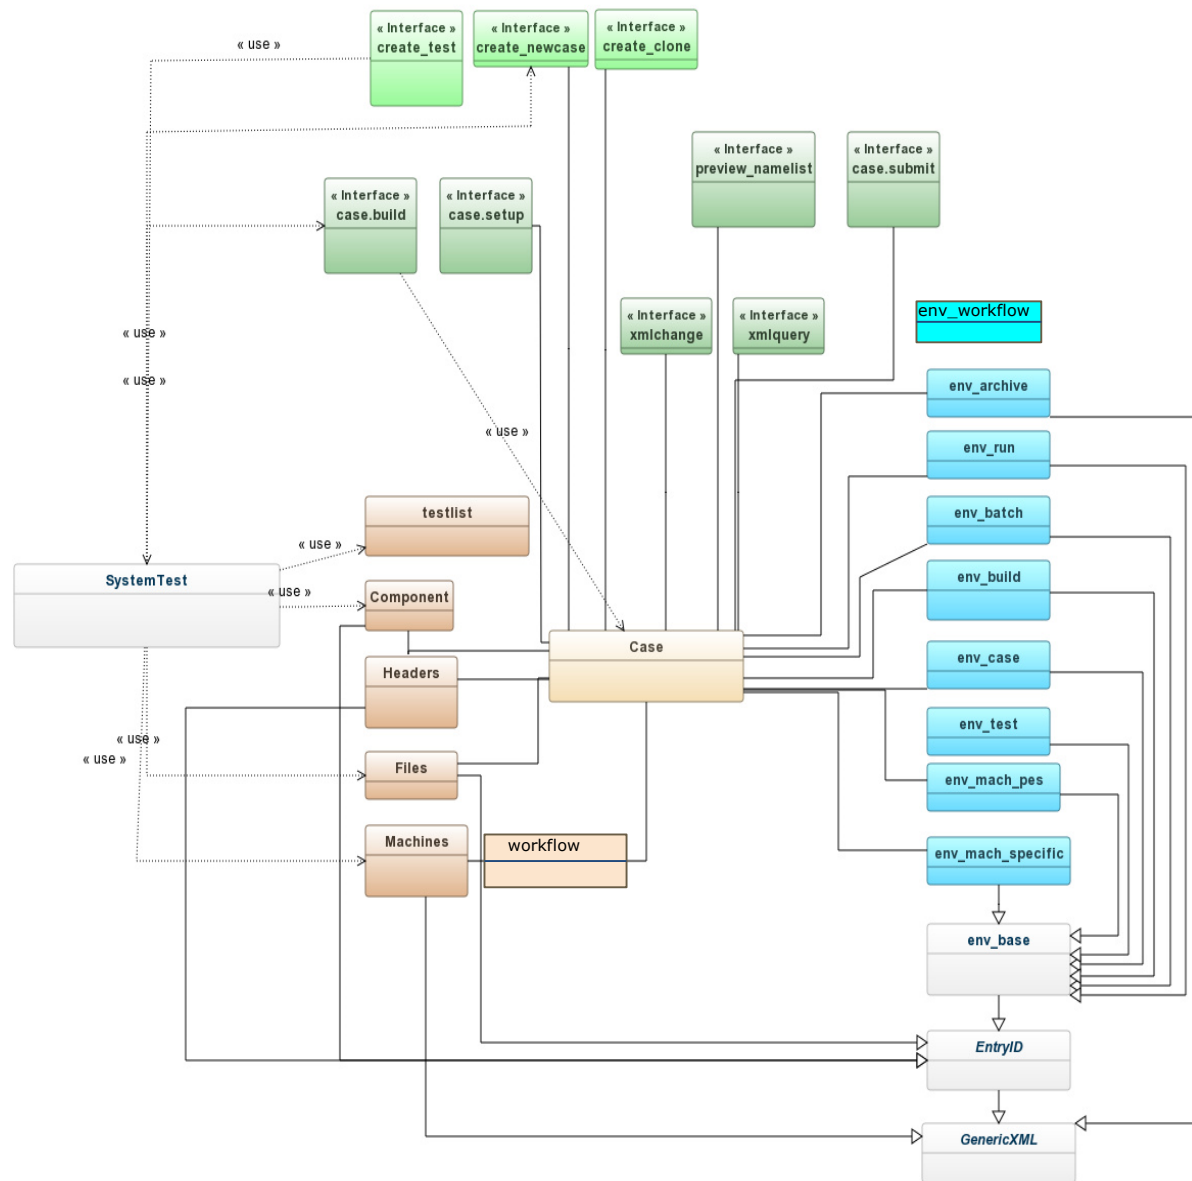

- Case Control System
 - Create, build and run an experiment
 - Unit testing
 - System testing
 - Record experiment provenance
- Inter-component Coupling Infrastructure
- Data Models (permits control of feedbacks)

CIME is used by CESM, E3SM, NORESM and is being considered for use in UFS

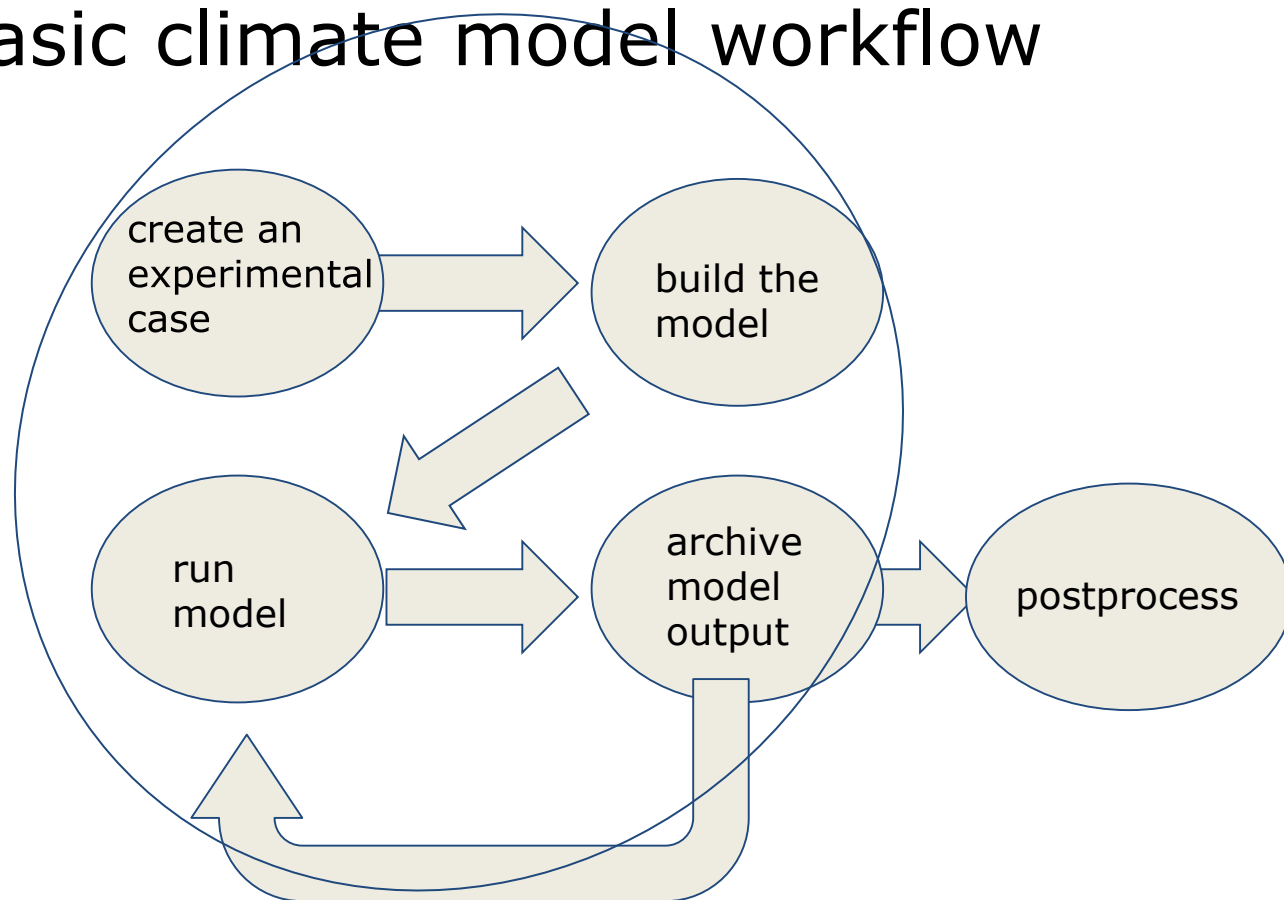

The CIME Case Control System (CCS)

The CCS is an extensible, coherent and coordinated set of object-oriented python scripts which uses a library of python objects along with data in xml to design, build and control the run of an earth system model.

The CCS has been designed to facilitate and encourage community collaboration!

Basic climate model workflow

CCS workflow generator

The CCS provides a basic workflow generator which uses queueing system native dependency tools to schedule jobs in a workflow.

Limitations:

- all jobs are submitted to queues
- no submission clock or calendar support
- limited to a single case

Use `preview_run` to view the current workflow.

XML Elements of a workflow definition.

- workflow_jobs {case, [prepend], [append]}
 - job {name}
 - template (script template to submit)
 - dependency (other job that must complete first)
 - prereq (logical to include in workflow)
 - runtime_parameters
 - task_count
 - tasks_per_node
 - walltime

Adding CYLC

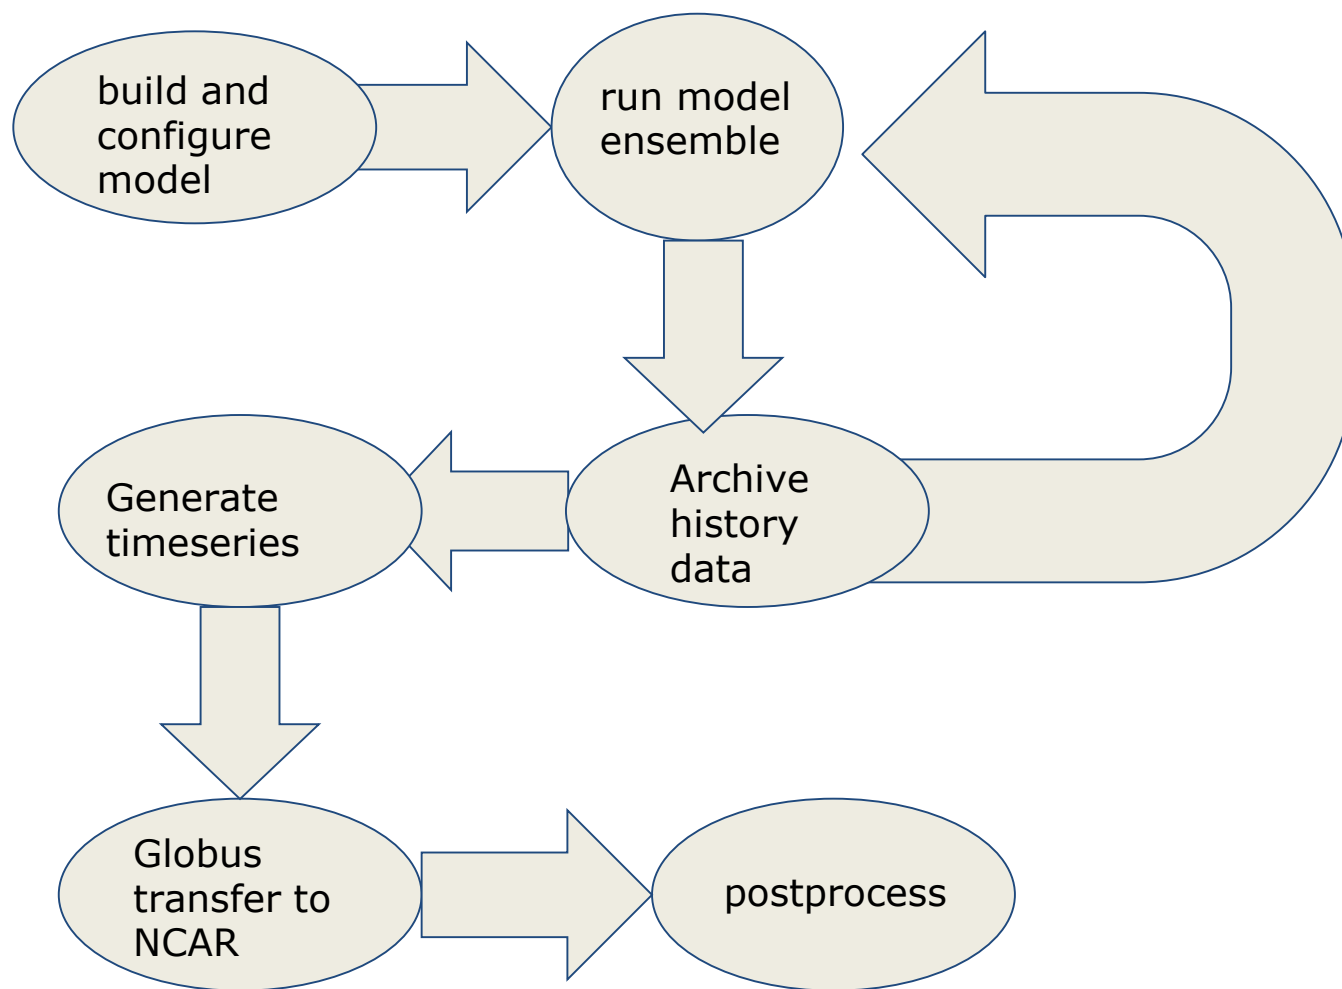

CCS provides a script **generate_cylc_workflow.py** to translate a CCS workflow to a CYLC suite.rc

- Provides support for ensembles
- Allows the user to customize workflows with all of the extensive feature set of CYLC

<https://cylc.github.io/>

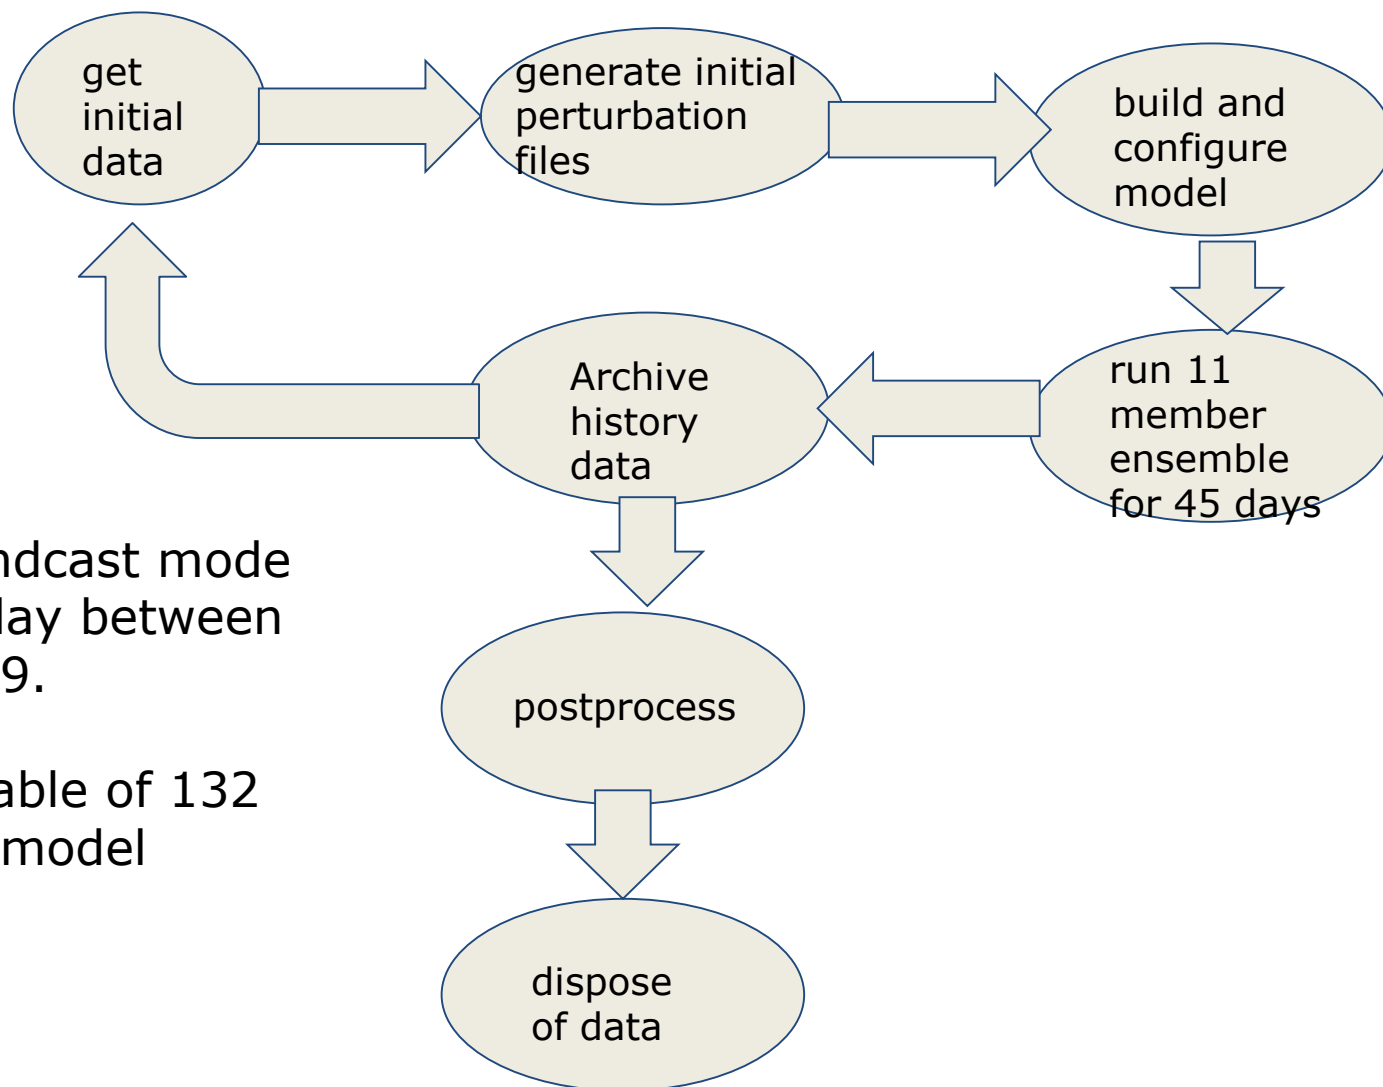

CESM2 Large Ensemble Experiment

- Cooperative project with ICCP South Korea
- 100 member ensemble climate study running from 1850-2100
- Will be run on the ICCP system Aleph with postprocessing and data storage at NCAR

NCAR/ICCP CESM2 CMIP6 Large Ensemble
Experiment Workflow

Subseasonal to Seasonal prediction using CESM and CYLC

Running in hindcast mode for each Monday between 1999 and 2019.

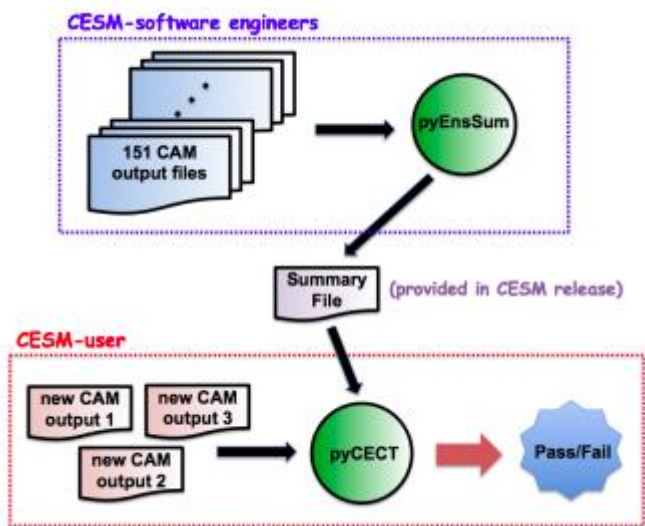

Currently capable of 132 simultaneous model simulations.

Foundational CESM2 workflow experience:

We would like to acknowledge and credit the work done by NCAR's ASAP group, especially Sheri Mickelson, in instrumenting CESM2 with CYLC for the CMIP6 experiments.

- CMIP6 Experimental Status (since August 2018)
 - Have run **979 different CESM cases**.
 - Published **690 cases**.
 - Generated **~1.3 PB of compressed (lossless)** time series files.
 - Published **~310 TB** of compressed CMIP6 files to ESGF.

CESM Ensemble verification test

CESM2 Ensemble Verification

Please see [CESM2 Python Tools](#) for details or for help with this form see [DiscussCESM](#)

ECT & UF-ECT *ONLY .NC FILES

Switch to POP-ECT

Run 1

Choose File No file chosen

Run 2

Choose File No file chosen

Run 3

Choose File No file chosen

Important
The process will take 6-10 minutes or more to complete
