Copernicus Services at ECMWF: An Overview

Thursday, 4 June 2020 07:35 (5 minutes)

This presentation will provide an overview of Copernicus Services at ECMWF. ECMWF is indeed the entrusted entity for the European Union's Copernicus Climate Change Service and the Copernicus Atmosphere Monitoring Service. The Copernicus Climate Change Service responds to environmental and societal challenges associated with human-induced climate change. The service will give access to information for monitoring and predicting climate change and will, therefore, help to support adaptation and mitigation. The Copernicus Atmosphere Monitoring Service provides continuous data and information on atmospheric composition. The service consists of daily global forecasts of atmospheric composition, daily forecasts of European air quality, global and regional reanalyses, as well as services on solar radiation, greenhouse gases and emissions.
