

Joint ECMWF/OceanPredict workshop on Advances in Ocean Data Assimilation

Tuesday, 18 May 2021

Theme 6: Assimilation of novel observations (13:30 - 15:30)

-Conveners: Daniel Lea; Patricia de Rosnay

time	[id] title	presenter
13:30	[30] Invited talk: Impact assessment of satellite observation in the Mercator Ocean global 1/12° system	Dr REMY, Elisabeth
14:00	[4] Assimilating wide-swath altimeter observations in a high-resolution shelf-seas analysis and forecasting system	KING, Robert
14:20	[65] The impact of assimilating novel observations on prediction of transport and eddies in Australia's Western Boundary Current System	KERRY, Colette
14:40	[25] Investigating the impact of satellite total surface current velocities assimilation in global ocean forecasting systems	WATERS, Jennifer
15:00	[76] Discussion	
15:10	Coffee break
