A few hundred catchments later – lessons from modelling large samples of catchments around the globe

Jan Seibert, Marc Vis, Sandra Pool
University of Zurich (JS&MV) and Eawag (SP)

Performance of an uncalibrated bucket type model (NSE)

Seasonal distribution of most informative point discharge observations

Regionalisation of model parameter values for the CAMELS-US catchments

Pool et al., in review

Blue: Normal soil routine better
Red: Simplified soil routine better
Black: No difference
