The EuroEXA Project - Co-Design for HPC from Facility to Application

Tuesday, 25 September 2018 11:30 (30 minutes)

EuroEXA is a H2020 project working on a co-designed architecture for ExaScale, it aims to improve energy efficiency 4X and performance 4X through collaborations between facility, hardware, system architecture, software and applications.

Peter Hopton of EuroEXA will tell us more about this exciting project, its vision and the results so far.
